# Embroidery Digitizing

Embroidery digitizing is the art of converting visual designs into digital instructions for embroidery machines. This intricate process involves defining stitch types, color sequences, and precise coordinates to recreate the design with thread on fabric. Expertise in specialized software and attention to detail are essential for achieving high-quality embroidered results that meet the specific needs of clients and projects.

## Software we Use:

Wilcom  
Pulse  
Melco

## Files we give:

DTS, EMB, PDF, OFM, PXF, PES.

# Portfolio

# Vector Artwork

A Vector logo is a type of logo design that is created using vector graphics software or tools. Unlike raster graphics, which are made up of pixels and can become pixelated when resized, vector graphics are composed of mathematical equations that define shapes and lines. This makes vector logos highly scalable and adaptable, allowing them to be resized to any dimension without loss of quality.

## Software we Use:

Illustrator  
Coral Draw

## Files we give:

SVG, CDR, PNG, PDF, AI, EPS.
